DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of copending Application No. 10/726,379 in view of Guérin et al, both newly cited. The application to Guérin et al claims a composite that may embrace more than one, "optionally hydrogenated, nitrile rubber polymer" wherein the claimed nitrile rubber may have a Mooney viscosity that embraces the limitation of "below 10," as recited in the instant claims. The patent to Guérin et al teaches the production of "hydrogenated nitrile rubber polymers" having Mooney viscosities "in the range of from 3 to 50." The employment of nitrile rubbers in mixture is taught in the application to Guérin et al at paragraph [0003]. Further, note the uses disclosed for nitrile rubbers at paragraph [0002], which would embrace those recited and claimed.
